PROJECTS

Freelance Backend Developer | Raju Mobile Accessories Store | [Live Demo](#)

Apr 2026 – Jun 2026

- Built a full-stack e-commerce platform using Java, spring boot and React, designing RESTful APIs for product management, order processing, user authentication, and admin operations.
- Implemented JWT-based authentication and role-based authorization, securing API endpoints and protecting customer and administrator data.
- Integrated Cloudinary for product image management and deployed the frontend and backend on cloud hosting platforms, enabling a live, production-ready application.

Full-Stack Developer (Project Lead) | Campus Vault | [Live Demo](#)

Oct 2025 – Apr 2026

- Designed and developed backend services and REST APIs using Java and Spring Boot, implementing JWT-based authentication and role-based access control for students and administrators.
- Built a MongoDB-based file management system for efficient storage and retrieval of academic resources.
- Integrated Spring Boot REST APIs with the React frontend, enabling secure and seamless data flow.
- Deployed the application on cloud infrastructure with a custom domain, improving reliability.
